

CLAIMS

- 5 1. A group of lockers or the like, including at least first and second neighbouring lockers, at least the first locker including a body forming a compartment having an open side, and a door of generally uniform cross section and of uniform curvature, this curvature lying upon a circle, the door being supported such that the door may be rotated from a closed position in
10 which the open side of the compartment is substantially covered by the door, to an open position in which the open side of the compartment is substantially uncovered, there being a cavity between first and second lockers, the door's curve remains lying upon the same circle during rotation, and the cavity being capable of accommodating the door whilst it is in the
15 closed position.
2. A group of lockers according to claim 1, wherein the cavity, when considered from the front of the lockers, is covered by a covering member.
- 20 3. A group of lockers according to claim 1, wherein the covering member includes a recess to accept the one edge of the door of the second locker.
4. A locker or the like including a body forming a non-cylindrical
25 compartment having an open side, and a door of generally uniform cross section and of uniform curvature, this curvature lying upon a circle, the door being supported such that the door may be rotated from a closed position in which the open side of the compartment is substantially covered by the

door, to an open position in which the open side of the compartment is substantially uncovered, the door's curve remains lying upon the same circle during rotation, the door being substantially outside the body of the locker when the locker is in the open position.

5

5. A locker or the like according to claim 4, wherein the door is supported upon pivot means.

10

6. A locker or the like according to claim 4, wherein the pivot means is supplied by one or more generally segmental shapes pivoted about the apex of the segmental shape.

15

7. A locker or the like according to claim 4, wherein there is included a locking means to secure the door in the closed position.

8. A locker or the like according to claim 7 wherein the locking means act upon the segmental shape.

20

9. A locker or the like according to claim 4, wherein an extruded handle is provided on the door.

10. A group of lockers according to claim 4.
